^{1/} USDA estimates and publishes individual cash receipt values only for major commodities and major producing states. The U.S. receipts for individual commodities, computed as the sum of the reported states, may understate the value of sales for some commodities, with the balance included in the appropriate category labeled "other" or "miscellaneous." The degree of underestimation in some of the minor commodities can be substantial. NA=Not available. NR=Not for release.

^{1/} The U.S. total exceeds the sum of the states because NASS does not release state data for some minor producing states due to disclosure issues. Horses, mules, and broilers are not included.

^{2/} Includes only farm share value for trucks and autos.

^{3/} All non-CCC crops held on farm plus the value above loan rate for crops held under CCC.

^{4/} Data for the value of purchased inputs are unavailable before 1984.

^{5/} Excludes debt for nonfarm purposes.

^{6/} Farmers Home Administration prior to 1994.

Source: Economic Resource Service/USDA

Totals may not add due to rounding.

^{3/} Includes minor oilseeds, sugar, tropical products, nursery & greenhouse, wine, essential oils, beverages, excluding juice, and other miscellaneous vegetable products.

^{1/} For production, NASS does not print some States for each commodity to avoid disclosing individual operations. Consequently, there are other States included in each total which must be accounted for in trade.

^{2/} Apples, apple juice, and apple products, as well as other miscellaneous fruits assumed to equal the previous year; current year production data has not yet been released.

Farm Real Estate Values And Cropland Values

U.S. farm real estate values, a measurement of the value of all land and buildings on farms, averaged \$1,360 per acre on January 1, 2004, up 7.1 percent from 2003. This is the largest percentage increase since 1994, when farm real estate values rose 8.0 percent from the previous year. The \$90 per acre increase is the largest dollar increase since 1980, when values climbed \$109 per acre above the 1979 value.

Cropland and pasture values rose by 7.2 and 6.4 percent, respectively, from January 1, 2003. Cropland values averaged \$1,780 per acre and pasture values averaged \$644 per acre on January 1, 2004, compared with \$1,660 and \$605 per acre, respectively, a year earlier. The value of other land and buildings rose 7.5 percent.

The increase in farm real estate values was driven by a combination of factors, including low interest rates, high commodity production and prices, and strong demand for nonagricultural land uses. Nationally, summarized survey data indicated that agricultural land with potential for immediate development (expected land use if sold) was valued at more than \$5,700 per acre.
